Training administration of Projektron BCS for advanced participants

Target audience

This training is targeted at active and experienced Projektron BCS administrators who have attended the Basic Training Administration and possess at least six months of experience in Projektron BCS administration. The training aims to deepen the participants' knowledge and introduce selected administrative functions such as status hand-over, customizing the user interface via the WebConfig editor and adjusting the data model.

After successful participation, you have the possibility to carry out additional configurations in Projektron BCS via the WebConfig editor (expert mode) for three years.
